

Frontend Developer Internship Test

No Use of **AI-generated code** We can deduct it easily.

Test:

Design & Develop the Product Listing Page based on the provided Figma design.

Figma Design:

<https://www.figma.com/design/U0mtBXWgFim69YDj4pjY8f/Front-end-test?node-id=0-1&t=oH11OPBWgwE38lvp-1>

Submission Deadline: 12th May 2026, 23:59 IST (Asia/Kolkata)

Submit To: softdef.hiring@gmail.com

Submission Requirements

1. GitHub Repository

- Provide a **public GitHub repository link** (or add reviewer access).
- Include a **README** with setup and run instructions.

2. Live Deployment Url

- Host your project on **Vercel** or **Render**.
- Must be **publicly accessible** (no password or login).

Strict Rule: No AI Tools

Use of **AI-generated code or assistance** (ChatGPT, Copilot, CodeWhisperer, etc.) is **strictly prohibited**.

If any part of the code is AI-generated, the submission will be **disqualified immediately**.

Goal

Recreate the Figma page **exactly as designed** — pixel-perfect, responsive, and functional across all devices. Focus on **clean, reusable components** and **attention to detail** in typography, spacing, and interactivity.

Languages & Tools Used

- **CSS3 / Tailwind CSS** – for styling and responsiveness
- **JavaScript/ Typescript / React.js / Next.js** – for component-based development
- **Git & GitHub** – for version control and submission
- **Vercel / Render** – for live deployment

Scope & Features

You must **replicate the given Figma design exactly** — pixel-perfect, responsive, and production-ready. Do **not** add, remove, or modify any elements beyond what's shown in the design.

A. Page Sections

- **Navbar:** Logo, navigation links, search/cart/user icons.
- **Hero Section:** Banner image, main heading, subtext, and call-to-action buttons.
- **Trending Plants Section:** Highlighted plant cards with image, text, and price.
- **Top Selling Plants Section:** Product grid with hover effects and consistent layout.
- **Customer Reviews Section:** Testimonials with name, avatar, and rating.
- **O₂ Plants Section:** Featured plant card with text and CTA button.
- **Footer:** Brand info, quick links, newsletter form, and social media icons.

B. Components

Break the page into **reusable React components** such as:

Navbar, HeroBanner, PlantCard, SectionTitle, TestimonialCard, Footer, Button. Each must follow the Figma design exactly and support configurable props.

C. Responsiveness

Ensure seamless layouts for **desktop, tablet, and mobile** (320px–1440px).
The visual structure and hierarchy must match the Figma intent at every breakpoint.

D. Styling & Framework

- Use **React Js / Next.js** and **Tailwind CSS**.
- Match **typography, spacing, colors, and shadows** exactly from Figma.
- Include hover, focus, and active states for interactive elements.

E. Interactivity

- Functional navigation and clickable buttons.
- Smooth hover transitions and animations (as shown in the design).
- Responsive mobile navigation (hamburger/drawer).

F. Accessibility & Performance

- Semantic HTML, **alt** text for images, and focus indicators.
- Keyboard-accessible navigation.
- Optimized images and responsive rendering.

What to Submit

- **Public GitHub repository** (with README)
- **Live deployed URL** (Vercel/Render/Netlify)

Disqualification Rules

- Use of AI tools (ChatGPT, Copilot, CodeWhisperer, etc.)
- Design not matching Figma (even slight differences)
- Missing required sections or broken layout

FAQs

Q1: Do I need to create a backend?

A: No. Only frontend implementation as per Figma is required.

Q2: Can I modify the design or add extra features?

A: No. The output must match the provided Figma exactly.

Q3: Can I use JavaScript instead of TypeScript?

A: Yes, JavaScript is allowed.

Q4: Can I use a CSS framework?

A: Tailwind CSS is allowed only. No UI kits (Bootstrap, MUI, Ant Design, etc.).

Q5: Can I ask questions?

A: Yes, send them to **softdef.hiring@gmail.com** before the deadline.

About the Internship

Position: Frontend Developer Intern

Company: softdef.com

Location: Remote (Work From Home)

Duration: 6 Months

Stipend: ₹5,000/month

Working Hours: Full-time (8 hours/day)

Responsibilities

- Build and maintain responsive web pages using React/Next.js
- Collaborate with design and backend teams
- Write clean, reusable, and efficient code

Requirements

- Proficiency in **JavaScript/TypeScript** and **Tailwind CSS**
- Hands-on experience with **React.js / Next.js**
- Familiarity with **REST APIs, JSON**, and **Git/GitHub**
- Good understanding of **responsive design**

Perks

- Internship Certificate & Letter of Recommendation
- Flexible work environment
- Work on real-world, production-grade projects
- Opportunity for **PPO (Pre-Placement Offer)** based on performance

About SoftDef

SoftDef is a technology company focused on building hospitality products — including hotel property management, club management, influencer-driven travel booking, and AI-powered tools.
